About Me

Scalable-focused MERN Stack Developer with expertise in building full-stack web applications using JavaScript, React.js, Node.js, Express.js, and MongoDB. Skilled in designing maintainable software grounded in Clean Architecture and SOLID principles. Experienced in building secure RESTful APIs with JWT authentication, integrating Stripe and Razorpay payment systems, and developing multi-tenant SaaS platforms. Adept at performance optimization, full-stack troubleshooting, and delivering business solutions through Git-based Agile workflows.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript

Frontend Development: React.js, Next.js, Redux, HTML5, Tailwind CSS, ShadCN/UI, TanStack Query (React Query), Adaptive UI Development, Cross-Browser Compatibility

Backend Development: Node.js, Express.js, RESTful API Design, JWT Authentication, OAuth 2.0, Socket.IO

Software Engineering: Object-Oriented Programming (OOP), SOLID Principles, Clean Architecture, MVC Architecture, Performance Optimization

Databases & Search: MongoDB, Elasticsearch, Firebase Firestore, Redis

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions

Tools: Git, GitHub, Git Workflow Postman, Figma

PROJECT EXPERIENCE

FitProERP – Multi-Tenant SaaS ERP Platform

[Live Demo](#) | [GitHub Repo](#)

A scalable SaaS ERP platform that streamlines gym management, membership subscriptions, session bookings, and branch operations.

- Architected and developed a multi-tenant SaaS ERP platform for gym management, supporting Super Admin, Admin, Trainer, and Member roles with granular role-based access control (RBAC).
- Built core modules including attendance tracking, membership subscriptions, trainer management, branch management, and session booking, salary management, enabling end-to-end gym operations management.
- Integrated Stripe payment processing for subscription billing payment workflows, ensuring secure and reliable financial transaction handling.
- Implemented real-time chat, live notifications, and typing indicators using Socket.IO, improving user engagement and operational responsiveness.
- Applied Clean Architecture and SOLID Principles throughout the codebase, enhancing maintainability, testability, and scalability.
- Dockerized the backend application to provide a reproducible runtime environment and streamline deployment across multiple environments.

BulkNation – E-Commerce Platform for Gym Supplements

[GitHub Repo](#)

An e-commerce platform that streamlines product browsing, secure payment processing, and end-to-end inventory and order management.

- Developed a full-featured e-commerce platform covering product management, category management, cart, wishlist, checkout, and order management workflows.
- Integrated Razorpay payment gateway for secure online transactions; implemented review and rating functionality to enhance user trust and engagement.
- Built comprehensive admin dashboards for product, user, and order management with authentication and authorization systems enforcing secure access.

EDUCATION

MERN Stack Development, BroTOTYPE

2024 – Present

Full Stack Web Development Training (MongoDB, Express.js, React.js, Node.js)

Higher Secondary Education – Commerce, GVHSS Koppam

2022
